

Caroline Rose
Open House
From 9:00:00 AM to 2:00:00 PM
63 Woodlawn Avenue
Kittery, Maine 03904

Phone: 207-475-2969
Email: Caroline.Rose3904@gmail.com

A look at the early stages Permaculture design being implemented on 1/10 of an acre: chickens, food production, composting, redefined zones for a more urban setting. Event includes a walk through the neighborhood and a discussion on how interpersonal connections can support resilience and foster a community-wide sense of security.

Site features: Tree Crops, Rainwater Collection, Livestock, Composting (any kind), Green or Natural Building Techniques, Swales and/or Other Earthworks, Annual Veg Production, De-Paving Techniques, Natural Play Spaces, A Drawn Design for the Property (or some of the property), Shrub Crops, Vertical Growing, Foraging Systems

Deborah Ganster
GreenFleece Farm
Open House
From 9:00:00 AM to 1:00:00 AM
576 Emery's Bridge Rd (note - follow the actual numbering, not GPS)
South Berwick, Maine 03908

Phone: 207-676-9886
Email: djganster@yahoo.com

GreenFleece Farm Open House

We have been integrating permaculture design ethics and principles for 6 yrs

Site features: Tree Crops, Perennial Vegetables, No-Dig Methods, Season Extension Methods, Renewable Energy, Livestock, Beekeeping, Hugelkultur, Composting (any kind), Green or Natural Building Techniques, Swales and/or Other Earthworks, Annual Veg Production, A Drawn Design for the Property (or some of the property), Shrub Crops, Vertical Growing, Foraging Systems, alternative forages, labyrinth, natural wool dyeing

Parking is available along the fields close to the entrance gate, a gravel road.

Thank you for participating in this decentralized and distributed celebration of some of the permaculture activity in Maine! We hope to expand on "Maine Permaculture Day" in future years.

Jesse McAvoy
Libby Farmden
Open House
From 10:00:00 AM to 5:00:00 PM
35 Libby Avenue
Westbrook, Maine 04092

Libby Farmden Open House

We have .46 acres that over the course of three years has been transformed from 100% lawn to a productive food forest and garden. There are now many fruit trees, a growing hazelnut hedge, and the beginnings of an apple espalier. We have a flock of chickens, and a family of ducks. There is also a natural pond that we dug three years ago, with fish and frogs (and sometimes ducks) inhabiting it. We have hugelkultur, keyhole beds, and companion planting.

Site features: Tree Crops, Perennial Vegetables, No-Dig Methods, Rainwater Collection, Water Features, Mushroom Production, Livestock, Forest Gardening / Food Forest Techniques, Hugelkultur, Composting (any kind), Annual Veg Production, Shrub Crops

There is plenty of street parking directly in front of the house, and down the street as far as need be.

Dawn York
Urban Farm Fermentory
A film screening or evening event
From 5:30 PM to 8:00 PM

200 Anderson Street
Portland, Maine 04101
<http://www.meetup.com/maine-permaculture/events/233066020/>

Evening Social Hour & Film Screening (Inhabit)

Join us to celebrate Maine Permaculture Day with a late afternoon/early evening potluck and social hour (5:30 to 7:00) followed by a screening of INHABIT: A Permaculture Perspective (featuring a bunch of local permies!).

Thank you for participating in this decentralized and distributed celebration of some of the permaculture activity in Maine! We hope to expand on "Maine Permaculture Day" in future years.

Feel free to park at Resilience Hub and walk over

Join Cultivating Community and Portland Food Co-op to generate a huge amount of people power to create new community garden spaces on the Eastern Prom!

Carol Karlsen

Open House
From 9:00:00 AM to 2:00 PM
Self guided tours are best, though Dave Homa and I will be available to answer questions and plant identifiers will assist visitors who wish to know the range of plants in the garden.

26 Caleb Street
Portland, Maine 04102
Phone: 899 0686
Email: ckarlsen@umich.edu

Permaculture Open House, Urban Food Forest. Featuring fruit and nut trees and bushes, including peach, pear, elderberry, and hazelnut; arbors planted out with grapes, hardy kiwi and schisandra, multiple planting beds with hoop houses; a small pond with water plants; and both perennial and annual vegetables. This property benefited from the talents of many, most notably permaculture designers Dave Homa, Heather Foran and Sarah Bostick and 24 community members who planned and implemented a permablitz on the property in July, 2013.

Site features: Tree Crops, Perennial Vegetables, No-Dig Methods, Season Extension Methods, Rainwater Collection, Water Features, Forest Gardening / Food Forest Techniques, Composting (any kind), Annual Veg Production, A Drawn Design for the Property (or some of the property), Shrub Crops, Vertical Growing

Thank you for participating in this decentralized and distributed celebration of some of the permaculture activity in Maine! We hope to expand on "Maine Permaculture Day" in future years.

Street parking is plentiful, two city buses stop half a block away on the corner of Caleb and Congress Sts, and assistance can be arranged for anyone who requests it.

Elaine G McGillicuddy

Open House

From 11:00:00 AM to 2:00:00 PM

I'll be on hand to chat with visitors and show the things that didn't turn out that well, e.g. Cinnamon Vine (though it's still growing) and the kiwi arbor (No kiwi yet) They can also see the chicken coop, not in use now, but I'd like to "rent it" to someone interested.

62 Avalon Road

Portland, Maine 04103

Backyard Rain Garden open house

Our residential yard is the product of a permaculture design by David Homa, which was implemented with the help of many friends in the community during a perma-blitz. Our goals included dealing with water flooding our back yard, expanding our living space by creating outside dining and seating areas, installing gutters and rain barrels as well as growing food. It is a work in progress but we are excited to share it with others.

Site features: No-Dig Methods, Season Extension Methods, Rainwater Collection, Water Features, Swales and/or Other Earthworks, Annual Veg Production, A Drawn Design for the Property (or some of the property), Raingarden or other stormwater re-use

On street parking is available. If folks need to park closer they are welcome to use our driveway.

Aaron Parker

Edgewood nursery

Open House

From 9:00:00 AM to 2:00:00 PM

There will be guided tours at 10:00 and 1:00, each lasting 1-2 hours depending on level of participation / interest, feel free to come late or leave early from the tour.

4 Cruston Way

Falmouth, Maine 04105

Edgewood Nursery Open House and Guided Tours

Stop by and see our 9 year old forest garden, featuring over 100 species of edible, medicinal or otherwise useful plants. Also tour the nursery where 30-40 species of edible / useful plants are available to purchase, some of these species are not available anywhere else in the state (a few nowhere else on the continent).

Site features: Tree Crops, Perennial Vegetables, No-Dig Methods, Season Extension Methods, Livestock, Plant Propagation / Nursery Techniques, Forest Gardening / Food Forest Techniques, Hugelkultur, Composting (any kind), Swales and/or Other Earthworks, Annual Veg Production, Shrub Crops

Limited parking available at the end of the driveway, but feel free to park anywhere along the right hand side coming down the driveway.

Thank you for participating in this decentralized and distributed celebration of some of the permaculture activity in Maine! We hope to expand on "Maine Permaculture Day" in future years.

40 Kaler Rd
South Portland, Maine 04106

Phone: 207-749-9331
Email: gerig59@gmail.com

We have lived at residence 3 years. Front yard has been transformed from lawn to garden for herbs and flowers for pollinators. A permablitz event last summer added rain barrels for water collection, raised beds for vegetables, season extension bed and green "room" with beginnings of perineal fruit and vegetable production. Approx 1/3 acre lot. Permaculture techniques: Sheet mulching, water conservation/collection, berms, companion planting, season extension. We use heat pump and wood for heating sources.

Thank you for participating in this decentralized and distributed celebration of some of the permaculture activity in Maine! We hope to expand on "Maine Permaculture Day" in future years.

Site features: Perennial Vegetables, No-Dig Methods, Season Extension Methods, Rainwater Collection, Renewable Energy, Composting (any kind), Swales and/or Other Earthworks, Annual Veg Production, A Drawn Design for the Property (or some of the property), Raingarden or other stormwater re-use

Parking on the street. Uneven grade and downward slope to back yard. Not handicapped accessible.

Midcoast Permaculture Open House

Come see an evolving permaculture design applied to a residential site on a southeast facing slope within spitting distance of downtown Rockland. Some of the forest gardens are approaching six years old and include trees, shrubs, herbs and poultry systems. Mainly focused on perennials with an edible jungle aesthetic. We will also have on display goal articulation statements, the design for the property and examples of other design work from our portfolio.

Site features: Tree Crops, Perennial Vegetables, No-Dig Methods, Season Extension Methods, Rainwater Collection, Water Features, Livestock, Forest Gardening / Food Forest Techniques, Hugelkultur, Swales and/or Other Earthworks, A Drawn Design for the Property

Thank you for participating in this decentralized and distributed celebration of some of the permaculture activity in Maine! We hope to expand on "Maine Permaculture Day" in future years.

(or some of the property), Shrub Crops, Raingarden or other stormwater re-use, Foraging Systems

Park in the driveway if there is room, otherwise park along the road. The site is hilly, so may be somewhat challenging if participants have mobility challenges.

Gale Davison

A film screening or evening event

From 10:00:00 AM to 8:00:00 PM

Screenings are time specific. Symphony of the Soil at 10am. In Transition 2 at 1pm. Inhabit at 4pm. How to Cook Your Life at 6:30pm. There is about one hour between screenings to allow for some brief discussion and eating brown bag provisions.

25 Eustis Parkway

Waterville, Maine 04901

Phone: 207-861-1695

Email: galedavison@me.com

Four Movies. Come to all or come for one. Symphony of the Soil at 10am. In Transition 2 at 1pm. Inhabit at 4pm. How to Cook Your Life at 6:30pm.

Participants will learn how a PDC graduate's thinking has evolved since initiating her journey with Permaculture in an urban environment and with a desire to seek out the Earth's priorities in her design. I've been exploring Shamanism since March 2016 and incorporating divination into my inside and outside designs. A divination search for a sacred vortex on my property led me to surprising results. An area with only air and stone. No vegetables in most of my yard. No other fruit trees but apples. The homework to consider my view has been expanded to include intentional sound. I will offer four movies to screen which cover three of my favorites from the PDC course and How to Cook Your Life which adds Zen and social permaculture considerations. Limit 6 people per showing. Please RSVP.

Site features: Composting (any kind), Spiritual spaces

Park on the street in front of my house. My driveway is short and traffic is fast. Two cars would fit on the lawn to the left of the driveway for people with mobility challenges. Two steps to enter front door.

manyhandsfarm.weebly.com

Many Hands Farm Open House

Many Hands Farm is a small family farm/homestead on 8 open acres of beautiful sloping fields. The farmers' intention is to steward the land using permaculture and biodynamics with an open-hearted awareness of the community of people, plants, animals and nature spirits on this little patch of earth. They grow a diversity of mostly open-pollinated, heirloom varieties of vegetables; fruit and nut trees; medicinal, tea and culinary herbs; and many edible flowers. They raise Nigerian dwarf dairy goats, American Guinea hogs, Welsh Harlequin and Ancona ducks, Buff geese, heritage breed chickens, and Mini Rex rabbits who collaborate with some pretty active worms to make the best compost on the planet!

Visitors may take a comprehensive tour of the many permaculture gardens, which demonstrate such techniques/principles as sheet mulching, hugelkultur, edible landscaping, terraced farming, working with the elementals (nature spirits), beauty, harmony and healing. Also see animals, unique cabins and outbuildings that all use a small footprint to create beautiful and highly functional spaces, the bunny/worm composting system, biodynamic compost windrows.

The farm stand will be stocked with vegetables, flowers, berries, eggs, goat cheese and pickles. Also for sale: fresh wood-oven-baked sourdough bread, Nyla's herbal remineralizing toothpaste, rose petal bead malas and herbal teas.

Thank you for participating in this decentralized and distributed celebration of some of the permaculture activity in Maine! We hope to expand on "Maine Permaculture Day" in future years.

Site features: Tree Crops, Perennial Vegetables, No-Dig Methods, Season Extension Methods, Rainwater Collection, Water Features, Livestock, Plant Propagation / Nursery Techniques, Forest Gardening / Food Forest Techniques, Hugelkultur, Composting (any kind), Green or Natural Building Techniques, Swales and/or Other Earthworks, Annual Veg Production, Natural Play Spaces, Compost Tea Making, Shrub Crops, Green/Living Roof, Crops Grown for Market, Vertical Growing, Foraging Systems

our homestead has a slope and many dips. It is difficult to tread if one is in a wheelchair or crutches...but not impossible. There are parking signs.

Thank you for participating in this decentralized and distributed celebration of some of the permaculture activity in Maine! We hope to expand on "Maine Permaculture Day" in future years.
